Product Engineer | AI Builder | AWS Certified Developer & ML Engineer

SUMMARY

MSc. Computer Science candidate and AWS Certified Machine Learning Engineer with a "builder-first" mindset. Specialized in bridging **AI architecture** with **market growth** by engineering agentic frameworks and automated product machinery. Expert in Python and TypeScript, with a proven track record of identifying friction points and autonomously building tools to solve them. Passionate about the "moonshot" approach to **AI-native security** and Product-Led Growth.

SKILLS

AI & Agentic Frameworks: LangChain, LangGraph, LLM APIs (OpenAI/Anthropic), Agentic RAG, CrewAI, VectorDB (Pinecone, Milvus), Semantic Search, LLM Fine-tuning

Product Engineering: Python, TypeScript/JavaScript, React.js, Next.js, Node.js, FastAPI, Django Rest Framework, Vercel, Replit, Cursor (AI-driven development)

Data & Cloud: AWS (SageMaker, S3, Lambda, EC2), PostgreSQL, SQL, Docker, Kubernetes, CI/CD, Telemetry & Usage Analytics

Strategy & Tools: Product-Led Growth (PLG) implementation, REST & GraphQL APIs, Radical Autonomy, Agile Prototyping

EDUCATION

The University of Toledo, MSc. Computer Science (concentration in AI)

Toledo, OH (Expected May 2026)

Softwarica College of IT and E-Commerce, BSc. (Hons) in Computing

Kathmandu, Nepal (2019 - 2022)

PROJECTS

Agent-Orchestrated Adaptive RAG (AI Product Machinery)

- Engineered an autonomous agentic system using **LangChain** that classifies user intent to dynamically route queries, serving as a prototype for automated technical requirement ingestion.
- Built "self-healing" retrieval loops using **Self-RAG** to eliminate retrieval blindness, ensuring high-reliability code-level priorities for AI agents.
- Implemented telemetry to track agent decision-making paths, optimizing for both technical precision and end-user UX.

Intelligent Search & Semantic Retrieval (Scale Engine)

- Developed a full-stack document processing pipeline using **TypeScript** and **VectorDB** to automate the ingestion of technical requirements.
- Productionized high-performance **FastAPI methods** to bridge the gap between technical architecture and user-facing features, improving search relevance for complex technical jargon.

EXPERIENCE

Software Engineer | DigiTechnology Nepal

Aug 2022 – July 2024

- Drove Product-Led Growth** by optimizing platform reliability for **1,000+ concurrent users**, directly impacting user retention and system scalability.
- Built a real-time business dashboard** using **React.js** and **Node.js**, synthesizing complex SQL analytics into actionable commercial insights for leadership.
- Autonomously refined** API endpoints and caching mechanisms, **reducing response times by 40%** to create a frictionless, self-serve onboarding experience.
- Collaborated with cross-functional teams to translate customer feedback loops into rapid feature prototypes.

Software Developer | Kaii Group

Aug 2021 – July 2022

- Developed backend services using **Django Rest Framework**, focusing on the intersection of technical architecture and operational efficiency.
- Engineered an automated data ingestion tool**, reducing manual effort by 30% and accelerating the technical sales-enablement loop.
- Identified and resolved performance bottlenecks in **Unix/Linux** environments, demonstrating **radical autonomy** in maintaining 99.9% system uptime.
- Conducted extensive testing and debugging to ensure our commercial strategy remained as technical and innovative as our product.

CERTIFICATIONS

AWS Certified Machine Learning Engineer – Associate | Amazon Web Services

(August 2025)

AWS Certified Developer – Associate | Amazon Web Services

(March 2025)
